## Evidence Appendix

CC1.1 - CC1.1 Control Environment readiness

GAP | severity 4 | evidence\_count 0

Demonstrate that control environment is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for control environment.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

SOC2-Q-001 - control environment cc1 control\_environment ethics tone policy owner evidence review log ticket control

tags: control\_environment, ethics, tone, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

SOC2-Q-002 - control environment cc1 control\_environment ethics tone policy owner evidence review log ticket control

tags: control\_environment, ethics, tone, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

SOC2-Q-003 - control environment cc1 control\_environment ethics tone policy owner evidence review log ticket control

tags: control\_environment, ethics, tone, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **CC1.2 - CC1.2 Control Environment readiness**

**GAP** | severity 5 | evidence\_count 0

Demonstrate that control environment is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for control environment.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

#### **SOC2-Q-002 - control environment cc1 control\_environment ethics tone policy owner evidence review log ticket control**

tags: control\_environment, ethics, tone, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

#### **SOC2-Q-003 - control environment cc1 control\_environment ethics tone policy owner evidence review log ticket control**

tags: control\_environment, ethics, tone, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

#### **SOC2-Q-004 - control environment cc1 control\_environment ethics tone policy owner evidence review log ticket control**

tags: control\_environment, ethics, tone, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **CC1.3 - CC1.3 Control Environment readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that control environment is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for control environment.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-003 - control environment cc1 control\_environment ethics tone policy owner evidence review log ticket control**

tags: control\_environment, ethics, tone, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-004 - control environment cc1 control\_environment ethics tone policy owner evidence review log ticket control**

tags: control\_environment, ethics, tone, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-001 - control environment cc1 control\_environment ethics tone policy owner evidence review log ticket control**

tags: control\_environment, ethics, tone, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**CC1.4 - CC1.4 Control Environment readiness**

**GAP** | severity 5 | evidence\_count 0

Demonstrate that control environment is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for control environment.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-004 - control environment cc1 control\_environment ethics tone policy owner evidence review log ticket control**

tags: control\_environment, ethics, tone, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-001 - control environment cc1 control\_environment ethics tone policy owner evidence review log ticket control**

#### **SOC2-Q-003 - control environment cc1 control\_environment ethics tone policy owner evidence review log ticket control**

tags: control\_environment, ethics, tone, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **CC2.1 - CC2.1 Communication and Information readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that communication and information is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for communication and information.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-005 - communication and information cc2 communication reporting governance policy owner evidence review log ticket control**

tags: communication, reporting, governance, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-007 - communication and information cc2 communication reporting governance policy owner evidence review log ticket control**

tags: communication, reporting, governance, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**CC2.2 - CC2.2 Communication and Information readiness**

**GAP** | severity 5 | evidence\_count 0

Demonstrate that communication and information is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for communication and information.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-006 - communication and information cc2 communication reporting governance policy owner evidence review log ticket control**

tags: communication, reporting, governance, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-007 - communication and information cc2 communication reporting governance policy owner evidence review log ticket control**

tags: communication, reporting, governance, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-008 - communication and information cc2 communication reporting governance policy owner evidence review log ticket control**

tags: communication, reporting, governance, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **CC2.3 - CC2.3 Communication and Information readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that communication and information is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for communication and information.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

#### **SOC2-Q-007 - communication and information cc2 communication reporting governance policy owner evidence review log ticket control**

tags: communication, reporting, governance, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

#### **SOC2-Q-008 - communication and information cc2 communication reporting governance policy owner evidence review log ticket control**

**SOC2-Q-006 - communication and information cc2 communication reporting governance policy owner evidence review log ticket control**

tags: communication, reporting, governance, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**CC2.5 - CC2.5 Communication and Information readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that communication and information is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for communication and information.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-005 - communication and information cc2 communication reporting governance policy owner evidence review log ticket control**

tags: communication, reporting, governance, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-006 - communication and information cc2 communication reporting governance policy owner evidence review log ticket control**

tags: communication, reporting, governance, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-007 - communication and information cc2 communication reporting governance policy owner evidence review log ticket control**

tags: communication, reporting, governance, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **CC3.1 - CC3.1 Risk Assessment readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that risk assessment is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for risk assessment.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

### **SOC2-Q-009 - risk assessment cc3 risk\_assessment threat\_modeling enterprise\_risk policy owner evidence review log ticket control**

tags: risk\_assessment, threat\_modeling, enterprise\_risk, soc2, readiness, security | hits: 0

#### **CC4.3 - CC4.3 Monitoring Activities readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that monitoring activities is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for monitoring activities.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-015 - monitoring activities cc4 monitoring metrics audit policy owner evidence review log ticket control**

tags: monitoring, metrics, audit, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-016 - monitoring activities cc4 monitoring metrics audit policy owner evidence review log ticket control**

tags: monitoring, metrics, audit, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-013 - monitoring activities cc4 monitoring metrics audit policy owner evidence review log ticket control**

tags: monitoring, metrics, audit, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**CC4.4 - CC4.4 Monitoring Activities readiness**

**GAP** | severity 5 | evidence\_count 0

Demonstrate that monitoring activities is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for monitoring activities.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-016 - monitoring activities cc4 monitoring metrics audit policy owner evidence review log ticket control**

tags: monitoring, metrics, audit, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-013 - monitoring activities cc4 monitoring metrics audit policy owner evidence review log ticket control**

tags: monitoring, metrics, audit, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-014 - monitoring activities cc4 monitoring metrics audit policy owner evidence review log ticket control**

tags: monitoring, metrics, audit, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

#### **CC4.5 - CC4.5 Monitoring Activities readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that monitoring activities is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for monitoring activities.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

#### **SOC2-Q-013 - monitoring activities cc4 monitoring metrics audit policy owner evidence review log ticket control**

tags: monitoring, metrics, audit, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

#### **SOC2-Q-014 - monitoring activities cc4 monitoring metrics audit policy owner evidence review log ticket control**

tags: monitoring, metrics, audit, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

#### **SOC2-Q-015 - monitoring activities cc4 monitoring metrics audit policy owner evidence review log ticket control**

tags: monitoring, metrics, audit, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

#### **CC5.1 - CC5.1 Control Activities readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that control activities is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for control activities.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-017 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-018 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-019 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**CC5.2 - CC5.2 Control Activities readiness**

**GAP** | severity 5 | evidence\_count 0

Demonstrate that control activities is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for control activities.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-018 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-019 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-020 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **CC5.3 - CC5.3 Control Activities readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that control activities is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for control activities.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

### **SOC2-Q-019 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **SOC2-Q-020 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **SOC2-Q-017 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **CC5.4 - CC5.4 Control Activities readiness**

**GAP** | severity 5 | evidence\_count 0

Demonstrate that control activities is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for control activities.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-020 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-017 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-018 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**CC5.5 - CC5.5 Control Activities readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that control activities is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for control activities.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-017 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-018 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-019 - control activities cc5 control\_activities review segregation policy owner evidence review log ticket control**

tags: control\_activities, review, segregation, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **CC6.1 - CC6.1 Logical and Physical Access readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that logical and physical access is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for logical and physical access.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

#### **SOC2-Q-021 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

#### **SOC2-Q-022 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

#### **SOC2-Q-023 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **CC6.2 - CC6.2 Logical and Physical Access readiness**

**GAP** | severity 5 | evidence\_count 0

Demonstrate that logical and physical access is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for logical and physical access.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-022 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-023 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-024 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**CC6.3 - CC6.3 Logical and Physical Access readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that logical and physical access is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for logical and physical access.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-023 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-024 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-021 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

#### **CC6.4 - CC6.4 Logical and Physical Access readiness**

**GAP** | severity 5 | evidence\_count 0

Demonstrate that logical and physical access is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for logical and physical access.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

#### **SOC2-Q-024 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

#### **SOC2-Q-021 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

#### **SOC2-Q-022 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

#### **CC6.5 - CC6.5 Logical and Physical Access readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that logical and physical access is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for logical and physical access.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-021 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-022 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-023 - logical and physical access cc6 logical\_access identity mfa policy owner evidence review log ticket control**

tags: logical\_access, identity, mfa, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**CC7.1 - CC7.1 System Operations readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that system operations is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for system operations.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-025 - system operations cc7 system\_operations logging alerting policy owner evidence review log ticket control**

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-026 - system operations cc7 system\_operations logging alerting policy owner evidence review log ticket control**

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-027 - system operations cc7 system\_operations logging alerting policy owner evidence review log ticket control**

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **CC7.2 - CC7.2 System Operations readiness**

**GAP** | severity 5 | evidence\_count 0

Demonstrate that system operations is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for system operations.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

#### **SOC2-Q-026 - system operations cc7 system\_operations logging alerting policy owner evidence review log ticket control**

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

#### **SOC2-Q-027 - system operations cc7 system\_operations logging alerting policy owner evidence review log ticket control**

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **CC7.3 - CC7.3 System Operations readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that system operations is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for system operations.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-027 - system operations cc7 system\_operations logging alerting policy owner evidence review log ticket control**

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-028 - system operations cc7 system\_operations logging alerting policy owner evidence review log ticket control**

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-025 - system operations cc7 system\_operations logging alerting policy owner evidence review log ticket control**

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**CC7.4 - CC7.4 System Operations readiness**

**GAP** | severity 5 | evidence\_count 0

Demonstrate that system operations is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for system operations.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-028 - system operations cc7 system\_operations logging alerting policy owner evidence review log ticket control**

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-025 - system operations cc7 system\_operations logging alerting policy owner evidence review log ticket control**

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-026 - system operations cc7 system\_operations logging alerting policy owner evidence review log ticket control**

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **CC7.5 - CC7.5 System Operations readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that system operations is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for system operations.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

### **SOC2-Q-025 - system operations cc7 system\_operations logging alerting policy owner evidence review log ticket control**

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **SOC2-Q-026 - system operations cc7 system\_operations logging alerting policy owner evidence review log ticket control**

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **SOC2-Q-027 - system operations cc7 system\_operations logging alerting policy owner evidence review log ticket control**

tags: system\_operations, logging, alerting, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

### **CC8.1 - CC8.1 Change Management readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that change management is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for change management.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-029 - change management cc8 change\_management sdlc release policy owner evidence review log ticket control**

tags: change\_management, sdlc, release, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-030 - change management cc8 change\_management sdlc release policy owner evidence review log ticket control**

tags: change\_management, sdlc, release, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**SOC2-Q-031 - change management cc8 change\_management sdlc release policy owner evidence review log ticket control**

tags: change\_management, sdlc, release, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

**CC8.2 - CC8.2 Change Management readiness**

**GAP** | severity 5 | evidence\_count 0

Demonstrate that change management is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for change management.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-030 - change management cc8 change\_management sdlc release policy owner evidence review log ticket control**

tags: change\_management, sdlc, release, soc2, readiness, security | hits: 0

No direct evidence hits for this query.

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

## **C2.2 - C2.2 Confidential Data Lifecycle readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that confidential data lifecycle is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for confidential data lifecycle.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

### **SOC2-Q-041 - confidential data lifecycle c2 confidentiality data\_handling retention policy owner evidence review log ticket control**

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **SOC2-Q-042 - confidential data lifecycle c2 confidentiality data\_handling retention policy owner evidence review log ticket control**

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **SOC2-Q-040 - confidential data lifecycle c2 confidentiality data\_handling retention policy owner evidence review log ticket control**

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

## **C2.3 - C2.3 Confidential Data Lifecycle readiness**

**GAP** | severity 5 | evidence\_count 0

Demonstrate that confidential data lifecycle is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for confidential data lifecycle.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-042 - confidential data lifecycle c2 confidentiality data\_handling retention policy owner evidence review log ticket control**

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

**SOC2-Q-040 - confidential data lifecycle c2 confidentiality data\_handling retention policy owner evidence review log ticket control**

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

**SOC2-Q-041 - confidential data lifecycle c2 confidentiality data\_handling retention policy owner evidence review log ticket control**

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

**C2.4 - C2.4 Confidential Data Lifecycle readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that confidential data lifecycle is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for confidential data lifecycle.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-040 - confidential data lifecycle c2 confidentiality data\_handling retention policy owner evidence review log ticket control**

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

**SOC2-Q-041 - confidential data lifecycle c2 confidentiality data\_handling retention policy owner evidence review log ticket control**

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

**SOC2-Q-042 - confidential data lifecycle c2 confidentiality data\_handling retention policy owner evidence review log ticket control**

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **C2.5 - C2.5 Confidential Data Lifecycle readiness**

**GAP** | severity 5 | evidence\_count 0

Demonstrate that confidential data lifecycle is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for confidential data lifecycle.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

#### **SOC2-Q-041 - confidential data lifecycle c2 confidentiality data\_handling retention policy owner evidence review log ticket control**

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

#### **SOC2-Q-042 - confidential data lifecycle c2 confidentiality data\_handling retention policy owner evidence review log ticket control**

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

#### **SOC2-Q-040 - confidential data lifecycle c2 confidentiality data\_handling retention policy owner evidence review log ticket control**

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **C2.6 - C2.6 Confidential Data Lifecycle readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that confidential data lifecycle is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for confidential data lifecycle.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-042 - confidential data lifecycle c2 confidentiality data\_handling retention policy owner evidence review log ticket control**

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

**SOC2-Q-040 - confidential data lifecycle c2 confidentiality data\_handling retention policy owner evidence review log ticket control**

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

tags: confidentiality, data\_handling, retention, soc2, readiness | hits: 0

No direct evidence hits for this query.

**A1.1 - A1.1 Availability Planning readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that availability planning is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for availability planning.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-043 - availability planning a1 availability capacity sla policy owner evidence review log ticket control**

tags: availability, capacity, sla, soc2, readiness | hits: 0

No direct evidence hits for this query.

**SOC2-Q-044 - availability planning a1 availability capacity sla policy owner evidence review log ticket control**

tags: availability, capacity, sla, soc2, readiness | hits: 0

No direct evidence hits for this query.

**A1.2 - A1.2 Availability Planning readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that availability planning is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for availability planning.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-044 - availability planning a1 availability capacity sla policy owner evidence review log ticket control**

tags: availability, capacity, sla, soc2, readiness | hits: 0

No direct evidence hits for this query.

**SOC2-Q-043 - availability planning a1 availability capacity sla policy owner evidence review log ticket control**

tags: availability, capacity, sla, soc2, readiness | hits: 0

No direct evidence hits for this query.

**A1.3 - A1.3 Availability Planning readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that availability planning is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for availability planning.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-043 - availability planning a1 availability capacity sla policy owner evidence review log ticket control**

tags: availability, capacity, sla, soc2, readiness | hits: 0

No direct evidence hits for this query.

**SOC2-Q-044 - availability planning a1 availability capacity sla policy owner evidence review log ticket control**

tags: availability, capacity, sla, soc2, readiness | hits: 0

No direct evidence hits for this query.

#### **A1.4 - A1.4 Availability Planning readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that availability planning is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for availability planning.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

#### **SOC2-Q-044 - availability planning a1 availability capacity sla policy owner evidence review log ticket control**

tags: availability, capacity, sla, soc2, readiness | hits: 0

No direct evidence hits for this query.

tags: availability, capacity, sla, soc2, readiness | hits: 0

No direct evidence hits for this query.

#### **A2.1 - A2.1 Backup and Recovery readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that backup and recovery is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for backup and recovery.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

#### **SOC2-Q-045 - backup and recovery a2 availability backup restore policy owner evidence review log ticket control**

tags: availability, backup, restore, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **SOC2-Q-046 - backup and recovery a2 availability backup restore policy owner evidence review log ticket control**

tags: availability, backup, restore, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **A2.2 - A2.2 Backup and Recovery readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that backup and recovery is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for backup and recovery.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

### **SOC2-Q-046 - backup and recovery a2 availability backup restore policy owner evidence review log ticket control**

tags: availability, backup, restore, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **SOC2-Q-045 - backup and recovery a2 availability backup restore policy owner evidence review log ticket control**

tags: availability, backup, restore, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **A2.3 - A2.3 Backup and Recovery readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that backup and recovery is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for backup and recovery.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

### **SOC2-Q-045 - backup and recovery a2 availability backup restore policy owner evidence review log ticket control**

tags: availability, backup, restore, soc2, readiness | hits: 0

No direct evidence hits for this query.

**SOC2-Q-046 - backup and recovery a2 availability backup restore policy owner evidence review log ticket control**

tags: availability, backup, restore, soc2, readiness | hits: 0

No direct evidence hits for this query.

**A2.4 - A2.4 Backup and Recovery readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that backup and recovery is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for backup and recovery.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-046 - backup and recovery a2 availability backup restore policy owner evidence review log ticket control**

tags: availability, backup, restore, soc2, readiness | hits: 0

No direct evidence hits for this query.

**SOC2-Q-045 - backup and recovery a2 availability backup restore policy owner evidence review log ticket control**

tags: availability, backup, restore, soc2, readiness | hits: 0

No direct evidence hits for this query.

**A3.1 - A3.1 Resilience Testing readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that resilience testing is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for resilience testing.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-047 - resilience testing a3 availability dr\_testing continuity policy owner evidence review log ticket control**

tags: availability, dr\_testing, continuity, soc2, readiness | hits: 0

No direct evidence hits for this query.

**SOC2-Q-048 - resilience testing a3 availability dr\_testing continuity policy owner evidence review log ticket control**

tags: availability, dr\_testing, continuity, soc2, readiness | hits: 0

No direct evidence hits for this query.

**A3.2 - A3.2 Resilience Testing readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that resilience testing is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for resilience testing.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-048 - resilience testing a3 availability dr\_testing continuity policy owner evidence review log ticket control**

tags: availability, dr\_testing, continuity, soc2, readiness | hits: 0

No direct evidence hits for this query.

**SOC2-Q-047 - resilience testing a3 availability dr\_testing continuity policy owner evidence review log ticket control**

tags: availability, dr\_testing, continuity, soc2, readiness | hits: 0

No direct evidence hits for this query.

**A3.3 - A3.3 Resilience Testing readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that resilience testing is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for resilience testing.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-047 - resilience testing a3 availability dr\_testing continuity policy owner evidence review log ticket control**

tags: availability, dr\_testing, continuity, soc2, readiness | hits: 0

No direct evidence hits for this query.

**SOC2-Q-048 - resilience testing a3 availability dr\_testing continuity policy owner evidence review log ticket control**

tags: availability, dr\_testing, continuity, soc2, readiness | hits: 0

No direct evidence hits for this query.

**A3.4 - A3.4 Resilience Testing readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that resilience testing is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for resilience testing.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-048 - resilience testing a3 availability dr\_testing continuity policy owner evidence review log ticket control**

tags: availability, dr\_testing, continuity, soc2, readiness | hits: 0

No direct evidence hits for this query.

**SOC2-Q-047 - resilience testing a3 availability dr\_testing continuity policy owner evidence review log ticket control**

tags: availability, dr\_testing, continuity, soc2, readiness | hits: 0

No direct evidence hits for this query.

**PI1.1 - PI1.1 Input Integrity readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that input integrity is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for input integrity.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-049 - input integrity pi1 processing\_integrity input\_validation completeness policy owner evidence review log ticket control**

tags: processing\_integrity, input\_validation, completeness, soc2, readiness,  
processingintegrity | hits: 0

No direct evidence hits for this query.

**PI1.2 - PI1.2 Input Integrity readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that input integrity is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for input integrity.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-049 - input integrity pi1 processing\_integrity input\_validation completeness policy owner evidence review log ticket control**

tags: processing\_integrity, input\_validation, completeness, soc2, readiness,  
processingintegrity | hits: 0

No direct evidence hits for this query.

**PI1.3 - PI1.3 Input Integrity readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that input integrity is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for input integrity.; Operational records (logs, tickets, reports, or dashboards)

demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-049 - input integrity pi1 processing\_integrity input\_validation completeness policy owner evidence review log ticket control**

tags: processing\_integrity, input\_validation, completeness, soc2, readiness, processingintegrity | hits: 0

No direct evidence hits for this query.

**PI2.1 - PI2.1 Processing Accuracy readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that processing accuracy is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for processing accuracy.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-050 - processing accuracy pi2 processing\_integrity accuracy reconciliation policy owner evidence review log ticket control**

tags: processing\_integrity, accuracy, reconciliation, soc2, readiness, processingintegrity | hits: 0

No direct evidence hits for this query.

**PI2.2 - PI2.2 Processing Accuracy readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that processing accuracy is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for processing accuracy.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-050 - processing accuracy pi2 processing\_integrity accuracy reconciliation policy owner evidence review log ticket control**

tags: processing\_integrity, accuracy, reconciliation, soc2, readiness, processingintegrity | hits: 0

No direct evidence hits for this query.

### **PI2.3 - PI2.3 Processing Accuracy readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that processing accuracy is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for processing accuracy.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

### **SOC2-Q-050 - processing accuracy pi2 processing\_integrity accuracy reconciliation policy owner evidence review log ticket control**

tags: processing\_integrity, accuracy, reconciliation, soc2, readiness, processingintegrity | hits: 0

No direct evidence hits for this query.

### **PI3.1 - PI3.1 Exception Handling readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that exception handling is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for exception handling.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

### **SOC2-Q-051 - exception handling pi3 processing\_integrity exceptions workflow policy owner evidence review log ticket control**

tags: processing\_integrity, exceptions, workflow, soc2, readiness, processingintegrity | hits: 0

No direct evidence hits for this query.

### **PI3.2 - PI3.2 Exception Handling readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that exception handling is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for exception handling.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-051 - exception handling pi3 processing\_integrity exceptions workflow policy owner evidence review log ticket control**

tags: processing\_integrity, exceptions, workflow, soc2, readiness, processingintegrity | hits: 0

No direct evidence hits for this query.

**PI3.3 - PI3.3 Exception Handling readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that exception handling is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for exception handling.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-051 - exception handling pi3 processing\_integrity exceptions workflow policy owner evidence review log ticket control**

tags: processing\_integrity, exceptions, workflow, soc2, readiness, processingintegrity | hits: 0

No direct evidence hits for this query.

**PI4.1 - PI4.1 Job and Batch Control readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that job and batch control is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for job and batch control.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-052 - job and batch control pi4 processing\_integrity job\_control batch policy owner evidence review log ticket control**

tags: processing\_integrity, job\_control, batch, soc2, readiness, processingintegrity | hits: 0

No direct evidence hits for this query.

**PI4.2 - PI4.2 Job and Batch Control readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that job and batch control is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for job and batch control.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-052 - job and batch control pi4 processing\_integrity job\_control batch policy owner evidence review log ticket control**

tags: processing\_integrity, job\_control, batch, soc2, readiness, processingintegrity | hits: 0

No direct evidence hits for this query.

**PI4.3 - PI4.3 Job and Batch Control readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that job and batch control is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for job and batch control.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-052 - job and batch control pi4 processing\_integrity job\_control batch policy owner evidence review log ticket control**

tags: processing\_integrity, job\_control, batch, soc2, readiness, processingintegrity | hits: 0

No direct evidence hits for this query.

**PI5.1 - PI5.1 Output Review readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that output review is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for output review.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-053 - output review pi5 processing\_integrity output\_review traceability policy owner evidence review log ticket control**

tags: processing\_integrity, output\_review, traceability, soc2, readiness, processingintegrity | hits: 0

No direct evidence hits for this query.

**PI5.2 - PI5.2 Output Review readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that output review is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for output review.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-053 - output review pi5 processing\_integrity output\_review traceability policy owner evidence review log ticket control**

tags: processing\_integrity, output\_review, traceability, soc2, readiness, processingintegrity | hits: 0

No direct evidence hits for this query.

**PI5.3 - PI5.3 Output Review readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that output review is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for output review.; Operational records (logs, tickets, reports, or dashboards)

demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-053 - output review pi5 processing\_integrity output\_review traceability policy owner evidence review log ticket control**

tags: processing\_integrity, output\_review, traceability, soc2, readiness, processingintegrity | hits: 0

No direct evidence hits for this query.

### **P1.1 - P1.1 Notice and Transparency readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that notice and transparency is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for notice and transparency.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-054 - notice and transparency p1 privacy notice consent policy owner evidence review log ticket control**

tags: privacy, notice, consent, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **P1.2 - P1.2 Notice and Transparency readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that notice and transparency is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for notice and transparency.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-054 - notice and transparency p1 privacy notice consent policy owner evidence review log ticket control**

tags: privacy, notice, consent, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **P2.1 - P2.1 Collection and Use Limitation readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that collection and use limitation is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for collection and use limitation.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-055 - collection and use limitation p2 privacy collection purpose\_limitation policy owner evidence review log ticket control**

tags: privacy, collection, purpose\_limitation, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **P2.2 - P2.2 Collection and Use Limitation readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that collection and use limitation is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for collection and use limitation.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-055 - collection and use limitation p2 privacy collection purpose\_limitation policy owner evidence review log ticket control**

tags: privacy, collection, purpose\_limitation, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **P3.1 - P3.1 Data Subject Rights readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that data subject rights is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for data subject rights.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-056 - data subject rights p3 privacy data\_subject\_rights request\_handling policy owner evidence review log ticket control**

tags: privacy, data\_subject\_rights, request\_handling, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **P3.2 - P3.2 Data Subject Rights readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that data subject rights is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for data subject rights.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-056 - data subject rights p3 privacy data\_subject\_rights request\_handling policy owner evidence review log ticket control**

tags: privacy, data\_subject\_rights, request\_handling, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **P4.1 - P4.1 Privacy Safeguards readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that privacy safeguards is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for privacy safeguards.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-057 - privacy safeguards p4 privacy safeguards confidentiality policy owner evidence review log ticket control**

tags: privacy, safeguards, confidentiality, soc2, readiness | hits: 0

No direct evidence hits for this query.

#### **P4.2 - P4.2 Privacy Safeguards readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that privacy safeguards is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for privacy safeguards.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

#### **SOC2-Q-057 - privacy safeguards p4 privacy safeguards confidentiality policy owner evidence review log ticket control**

tags: privacy, safeguards, confidentiality, soc2, readiness | hits: 0

No direct evidence hits for this query.

#### **P5.1 - P5.1 Third-Party Privacy Management readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that third-party privacy management is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for third-party privacy management.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

#### **SOC2-Q-058 - third-party privacy management p5 privacy third\_party contracts policy owner evidence review log ticket control**

tags: privacy, third\_party, contracts, soc2, readiness | hits: 0

No direct evidence hits for this query.

#### **P5.2 - P5.2 Third-Party Privacy Management readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that third-party privacy management is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for third-party privacy management.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-058 - third-party privacy management p5 privacy third\_party contracts policy owner evidence review log ticket control**

tags: privacy, third\_party, contracts, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **P6.1 - P6.1 Privacy Monitoring readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that privacy monitoring is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for privacy monitoring.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-059 - privacy monitoring p6 privacy monitoring compliance policy owner evidence review log ticket control**

tags: privacy, monitoring, compliance, soc2, readiness | hits: 0

No direct evidence hits for this query.

### **P6.2 - P6.2 Privacy Monitoring readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that privacy monitoring is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for privacy monitoring.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-059 - privacy monitoring p6 privacy monitoring compliance policy owner evidence review log ticket control**

tags: privacy, monitoring, compliance, soc2, readiness | hits: 0

No direct evidence hits for this query.

#### **P7.1 - P7.1 Privacy Incident Response readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that privacy incident response is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for privacy incident response.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-060 - privacy incident response p7 privacy incident\_response breach policy owner evidence review log ticket control**

tags: privacy, incident\_response, breach, soc2, readiness | hits: 0

No direct evidence hits for this query.

#### **P7.2 - P7.2 Privacy Incident Response readiness**

**GAP** | severity 3 | evidence\_count 0

Demonstrate that privacy incident response is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for privacy incident response.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

**SOC2-Q-060 - privacy incident response p7 privacy incident\_response breach policy owner evidence review log ticket control**

tags: privacy, incident\_response, breach, soc2, readiness | hits: 0

No direct evidence hits for this query.

#### **P8.1 - P8.1 Retention and Disposal readiness**

**GAP** | severity 4 | evidence\_count 0

Demonstrate that retention and disposal is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for retention and disposal.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

### SOC2-Q-061 - retention and disposal p8 privacy retention deletion policy owner evidence review log ticket control

tags: privacy, retention, deletion, soc2, readiness | hits: 0

No direct evidence hits for this query.

### P8.2 - P8.2 Retention and Disposal readiness

**GAP** | severity 3 | evidence\_count 0

Demonstrate that retention and disposal is defined, operated, and reviewable with reproducible local evidence.

Expected evidence: Written policy or procedure showing ownership, approval, and review cadence for retention and disposal.; Operational records (logs, tickets, reports, or dashboards) demonstrating the control is performed consistently.; Evidence of exception handling and remediation tracking when control failures or gaps are identified.

### SOC2-Q-061 - retention and disposal p8 privacy retention deletion policy owner evidence review log ticket control

tags: privacy, retention, deletion, soc2, readiness | hits: 0

No direct evidence hits for this query.
